

Curriculum plan: art and design

"Art is not what you see, but what you make others see"

Edgar Degas

Our intent:

Young people need to show inquisitiveness in order to understand and appreciate how Art contributes to the culture, creativity and the wealth of our nation.

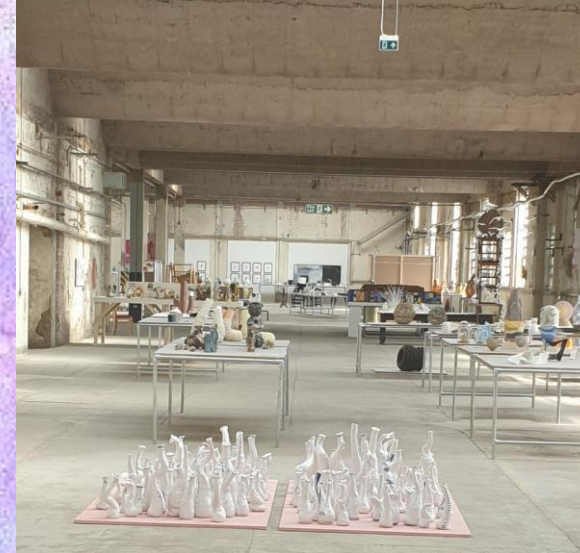

Studying art and design at Woodhouse Academy allows students to explore an array of media sources and techniques that will challenge, inspire and excite them. We aim to provide students with an in-depth appreciation of key concepts, including design creativity, textiles, construction, clay, printing, collage and many other experiences . We provide opportunities for students to develop a critical understanding of a range of art movements and connected artists. Students can then begin to express their own opinions in order to inform and develop their own creativity.

Enrichment in art and design

The Woodhouse Academy art experience is complimented by cross-curricular links with English, design technology and music. Our enrichment programme is designed to bring art and design alive and we have enjoyed visits from a ceramics artist and designer, participated in the clay school and visited the Spode gallery.
